ASTERION INDUSTRIAL SYSTEMS PVT. LTD.
INTERNAL EVIDENCE PACKET

VerityAI demonstration dataset • Fictional company • FY 2025–26

Document ID	AIS-COMP-EVID-2026-001
Classification	CONFIDENTIAL — INTERNAL USE ONLY (SYNTHETIC DATA)
Prepared by	Office of Risk, Compliance & Internal Audit
Evidence period	01 April 2025 – 31 March 2026
Issue date	15 October 2026
Version	1.0

Important: Asterion Industrial Systems Pvt. Ltd. is entirely fictional. All names, figures, identifiers, policies, incidents and records in this packet are invented for software testing. Do not treat this document as a real audit record or compliance certification.

Purpose: This packet contains internally consistent, claim-ready evidence records for testing VerityAI document ingestion, claim extraction, evidence retrieval, eligibility evaluation and report generation.

1. Company profile and governance

Asterion Industrial Systems Pvt. Ltd. (AIS) is a fictional Pune-based manufacturer of industrial sensor assemblies. The company has 420 employees, one manufacturing facility and two regional sales offices. The Board Risk Committee oversees enterprise risk, information security and regulatory compliance.

EV-GOV-001 — Board oversight

Evidence statement: The Board Risk Committee met four times during FY 2025–26, and meeting minutes were approved within 10 business days after each meeting.

Source record: Board Secretariat register BR-2026; meeting dates: 18 Jun 2025, 17 Sep 2025, 12 Dec 2025 and 19 Mar 2026.

EV-GOV-002 — Code of conduct training

Evidence statement: Code of Conduct training was completed by 96% of active employees as of 31 March 2026.

Source record: Learning Management System export LMS-FY26-031; 403 of 420 active employees completed the assigned module; 17 were pending.

EV-SEC-001 — Multi-factor authentication

Evidence statement: Multi-factor authentication was enabled for 100% of privileged user accounts as of 31 March 2026.

Source record: Identity access management review IAM-Q4-26; 38 of 38 privileged accounts enrolled; reviewer: IT Security Manager; review date: 05 Apr 2026.

EV-SEC-002 — Vulnerability remediation

Evidence statement: All critical vulnerabilities identified in the Q4 FY 2025–26 internal vulnerability scan were remediated within the 15-day remediation target.

Source record: Internal scan report VULN-Q4-26; 4 critical findings identified on 02 Mar 2026; closure verified on 14 Mar 2026; maximum remediation time: 12 days.

EV-BCP-001 — Business continuity exercise

Evidence statement: A business continuity exercise was conducted on 22 January 2026, and all six planned recovery scenarios were completed.

Source record: Business continuity exercise record BCP-EX-2026-01; six scenarios tested; exercise owner: Operations Risk; final report approved 29 Jan 2026.

EV-FIN-001 — External audit

Evidence statement: The FY 2025–26 statutory financial audit was completed, and the auditor issued an unmodified opinion dated 30 September 2026.

Source record: Fictional independent auditor report reference AUD-FY26-09; signed 30 Sep 2026; financial statements cover year ended 31 Mar 2026.

EV-VND-001 — Supplier due diligence

Evidence statement: Annual due diligence was completed for 92% of active critical suppliers as of 31 March 2026.

Source record: Supplier governance register SUP-CRIT-FY26; 46 of 50 critical suppliers reviewed; four reviews remained open at period end.

EV-ENV-001 — Energy reduction

Evidence statement: Electricity consumption at the Pune manufacturing facility decreased by 8% in FY 2025–26 compared with FY 2024–25.

Source record: Utility ledger ENV-ENERGY-FY26; FY25 consumption 1,250 MWh; FY26 consumption 1,150 MWh; reduction calculated as 8%.

EV-HR-001 — Workplace safety

Evidence statement: The company recorded zero lost-time injury incidents at its Pune manufacturing facility during FY 2025–26.

Source record: EHS incident register EHS-FY26; reporting period 01 Apr 2025 to 31 Mar 2026; zero LTI cases; monthly sign-off by Plant EHS Lead.

EV-DAT-001 — Data retention review

Evidence statement: A data retention review was completed on 14 February 2026, and three outdated storage locations were scheduled for deletion.

Source record: Privacy operations ticket PRIV-RET-2026-14; review owner: Data Protection Office; deletion target date: 31 May 2026; closure evidence not included in this packet.

2. Internal control notes and exceptions

The following notes are intentionally included so VerityAI can encounter both supporting and qualifying evidence rather than a packet containing only positive claims.

EX-01 — Supplier review gap

Four of 50 critical suppliers had not completed annual due diligence by 31 March 2026. The completion rate was 92%, not 100%. A remediation owner was assigned on 08 April 2026; closure evidence is not present in this packet.

EX-02 — Training gap

Seventeen active employees had not completed Code of Conduct training by 31 March 2026. The completion rate was 96%, not 100%. Follow-up reminders were issued on 03 April 2026.

EX-03 — Retention deletion pending

The data retention review identified three outdated storage locations for deletion. This packet records the scheduled deletion but does not contain evidence that deletion was completed.

EX-04 — Scope limitation

The zero lost-time injury statement applies only to the Pune manufacturing facility. It must not be generalized to contractors, sales offices or the entire supplier network.

3. Evidence register

Evidence ID	Topic	Record / reference	Period / date
EV-GOV-001	Board oversight	BR-2026	FY 2025–26
EV-GOV-002	Conduct training	LMS-FY26-031	31 Mar 2026
EV-SEC-001	MFA coverage	IAM-Q4-26	31 Mar 2026
EV-SEC-002	Critical vulnerabilities	VULN-Q4-26	Mar 2026
EV-BCP-001	Continuity exercise	BCP-EX-2026-01	22 Jan 2026
EV-FIN-001	Financial audit	AUD-FY26-09	30 Sep 2026
EV-VND-001	Supplier due diligence	SUP-CRIT-FY26	31 Mar 2026
EV-ENV-001	Energy consumption	ENV-ENERGY-FY26	FY 2025–26
EV-HR-001	Workplace safety	EHS-FY26	FY 2025–26
EV-DAT-001	Data retention	PRIV-RET-2026-14	14 Feb 2026

4. Suggested VerityAI intake claims

For the first end-to-end demo, copy one or more of the following claims into the intake form. These sentences are intentionally identical to the evidence statements above, allowing the retrieval pipeline to test direct matching. You can later try broader or contradictory claims to test evidence qualification.

> **Claim 1:** The Board Risk Committee met four times during FY 2025–26, and meeting minutes were approved within 10 business days after each meeting.

Claim 2: Code of Conduct training was completed by 96% of active employees as of 31 March 2026.

Claim 3: Multi-factor authentication was enabled for 100% of privileged user accounts as of 31 March 2026.

Claim 4: All critical vulnerabilities identified in the Q4 FY 2025–26 internal vulnerability scan were remediated within the 15-day remediation target.

Claim 5: A business continuity exercise was conducted on 22 January 2026, and all six planned recovery scenarios were completed.

Claim 6: The FY 2025–26 statutory financial audit was completed, and the auditor issued an unmodified opinion dated 30 September 2026.

Claim 7: Annual due diligence was completed for 92% of active critical suppliers as of 31 March 2026.

Claim 8: Electricity consumption at the Pune manufacturing facility decreased by 8% in FY 2025–26 compared with FY 2024–25.

Claim 9: The company recorded zero lost-time injury incidents at its Pune manufacturing facility during FY 2025–26.

Claim 10: A data retention review was completed on 14 February 2026, and three outdated storage locations were scheduled for deletion.

Suggested first test: use Claims 3, 4 and 7 together. Claim 3 and Claim 4 have direct supporting records; Claim 7 is supported at 92% but also has an explicit four-supplier exception. This helps demonstrate both positive evidence and a qualification that should not be overstated.

END OF SYNTHETIC EVIDENCE PACKET
